

Zenoti Implementation

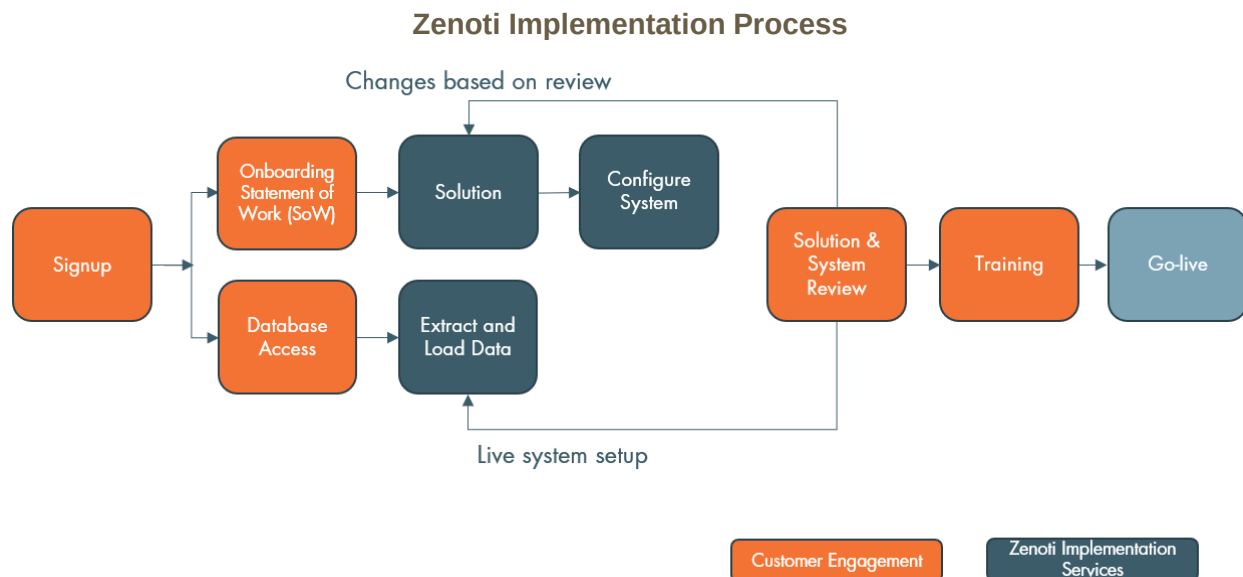

Customer Engagement Guide for Large Enterprises

Ver 3.2

Implementation Process Overview

The Zenoti Implementation methodology is prescriptive, yet, flexible process, which ensures that you, our customer, is successfully set up and adopting Zenoti.

After signing on with us, you'll be assigned a Zenoti Project Manager who will help you through each step of the on-boarding process.

Zenoti on-boarding process can be divided into four phases like below:

- Set up of your Zenoti system with your data
- Scope defined, and Statement of Work signed for the initial phase of onboarding
- Solution and system review
- Training
- Go live

A few points to think about while launching the software:

- Your time for any decisions, regular project reviews
- Your team's availability to respond to us quickly on any inputs
- Managing change in your organization

The rest of this document will detail out the engagement expected from your organization, the various recommended roles or job functions to be engaged, and the approach.

Managing change in your organization

It is very common to have resistance towards a change. A change will be accepted well when the people impacted by the change realize the benefits they get from that change. We strongly recommend involving more and important members of your organization in the initial stages as appropriate, so that they appreciate the change. And they will help create a positive atmosphere for the software launch and become the change champions in your organization at various levels.

It is important to have the project team with members from different functional teams of the organization, like below:

- **Project Sponsor** - final decision authority
- **Dedicated Project Manager**
- **Head(s) of Operations** - with deep knowledge of current operations and systems, and processes
- **Product and Inventory manager/representative**- the staff at corporate location or a representative from outlets who manage retail and professional products procurement and distribution.
- **System Administrator(s)**- the staff at corporate location managing system administration such as service creations, help desk and so on
- **Center Managers/Supervisors/Leads**- with deep knowledge of current operations, current system, and outlet level operations
- **Key Franchise owners/influencers**- change champions, key stakeholders perspective, process change approvers
- **IT Administrator/Manager**- access to database(s), infrastructure setup
- **Marketing representative**- branding, online presence, and campaign managers
- **Accounting/Finance representative**- Outlet level accounting knowledge, corporate accounting requirements
- **Training staff**- franchisee support, new locations onboarding, change champions
- (Optional) **Front Desk representative**- change champion
- (Optional) **Therapist representative**- change champion
- (Optional) **Call Center representative**- deep knowledge of current call center operations

Set up of your Zenoti system with your data

Zenoti team assigned to your project will extract and load data from your current system into Zenoti, as a first step. This will enable all solution review is using data and masters (such as services, products, etc.) that your team is familiar with.

Database Access

Customer Team(s): IT Administrator/Manager

Approach

In order to load the data, the Zenoti team will need access to your current system database

backup or data extracts. In most cases, Zenoti team can extract the backups and data if the necessary levels of access to the database server and the database are enabled.

While giving access to the Zenoti team is highly recommended to ensure speed and accuracy, as an alternative, the data can be shared with us on a secure dropbox or SFTP location by your IT team.

Zenoti team will load the data related to at least 2 outlets, using standardized scripts. The data loaded would include masters, guest information and history representing at least 3 months. The purpose of this initial load is to enable the solution review and system walkthrough. The full data load will include all years of history as mutually agreed in the master agreement.

Solution and system review

Zenoti team will load the data, and configure a Stage (test) system for an initial system walkthrough. The team will follow best practice solutions suitable for your business.

Preliminary system walkthrough

Customer Team(s): All identified project team members

Approach

The purpose of the preliminary system walkthrough is to provide an overview of Zenoti to all of the project team. Typically, this will be 2-3 hours, in-person or virtual sessions, presented by a Zenoti specialist.

Solution and system review sessions

The main goal of the solution and system review deep dive sessions is to finalize the data, solutions, and configurations in Zenoti, to meet your operational requirements.

This is expected to be an iterative process with an initial solution review, fine-tuning of data and final reviews. The output of these sessions is a mutually agreed and approved document detailing the solutions and configurations.

Typically, these sessions are managed using virtual meetings up to 2 hours each session. The final end-end walkthrough is typically an in-person meeting with all stakeholders attending.

Topic	Customer Team(s)	Focus areas	Typical Duration (schedule hours)
Services management	Head of Operations System administrator	Management, masters data, service configurations and administration in Zenoti	Upto 2 hrs
Product setup	Head of Operations	Management, master data,	Upto 2 hrs

	System administrator Inventory managers	configurations, and administration.	
Vendors and Inventory mgt	Head of Operations System administrator Inventory managers	Vendor setup and management, master data Inventory management, purchase orders, etc.	Upto 2 hrs
Memberships	Head of Operations System administrator Center managers	Management, configurations, data migration, masters	4 to 6 hours (iterative)
Packages	Head of Operations System administrator Center manager	Management, configurations, data migration, masters	Upto 2 hrs
Gift Card (in-store and online)	Head of Operations System administrator Center manager	Management, configurations, data migration	Upto 1 hr
Employee & Payroll management + reporting	Center Manager/Supervisors Franchise Owners System administrator	Employee setup, commissions, payroll, reports, scheduling, service associations, employee app usage, security roles and jobs, data migration	2 to 4 hours (iterative)
Discounts & Campaigns, Notifications, Smart Marketing	Marketing Manager Center Manager Franchise Owner System Administrator Head of Operations	Management of discounts and email/text campaigns, smart marketing demo, branding and content requirements, transactional notifications, feedback/Social reviews	4 to 6 hrs (iterative)
Online Booking, Customer Mobile App, Zenoti Go	Marketing Manager Center Manager Franchise Owner System Administrator Head of Operations IT Manager	Booking flow, transition solution, integration with the current portal, mobile app branding, and setup, zenoti go process and rollout planning. CMA rollout planning	4 to 6 hours (iterative)
Digital forms- Intake, Service Forms, Membership Forms	Center Manager Franchise Owner System Administrator Head of Operations	Customer intake form process, Zenoti Mobile, Kiosk usage, Service forms requirements, membership signup process, forms	2 to 4 hours (iterative)
POS and Appointment Book, Booking Wizard, Zenoti Mobile	Center Manager Franchise Owner System Administrator Head of Operations Front Desk Rep	Bookings, retail sales, employee access, wizard flow and configurations, employee clock in/out, guest check-ins, Zenoti Mobile	2 to 4 hrs

	Call Center Rep Therapist Rep	configurations/usage, and flow, Kiosk/Self-check-in	
Zenoti Connect	Center Manager Franchise Owner Head of Operations Front Desk Rep Call Center Rep Therapist Rep	Zenoti Connect features, usage flow	Upto 1 hr
Zenoti Analytics	Head of Operations Marketing Manager Franchise Owners	Analytics Express, Analytics Plus walk-through, custom reporting capabilities	Upto 1 hr
Operational reporting	Center Managers Franchise Owners Head of Operations	Daily, weekly, operational reports review,	2 to 4 hrs (iterative)
Accounting	Accounting Rep Franchise Owners Center Managers	Financial reports review	2 to 4 hrs (iterative)
Transition process	Head of Operations IT Manager System Administrator Training staff	Cross centers liability management during the transition, data/reporting needs, Customer App phased rollout process, royalty reports	Upto 4 hrs (iterative)
IT Infrastructure review	IT Manager	Review current IT infrastructure, Zenoti HW, SW, NW infrastructure requirements, including credit card payments infrastructure, identify changes required and rollout approach.	Upto 2 hrs (iterative)
Final Solution Walkthrough	All	End-end solution walkthrough	Upto 4 hrs

Training

We conduct virtual classroom training online using your site and also using a pre-populated stage site with your typical master data and configurations finalized during the solution and system review sessions. We recommend doing shorter training sessions that will help the audience to absorb as much as they want.

Training is structured for particular audiences, i.e. administrators, owners, managers as well as front desk, to ensure that each staff member receives the information they require for their job function.

If you have in house trainers, the content can be focused on training the trainers

Front Desk Staff (30-minute session)

Appointment Booking, Checkin, Checking-out, POS, Managing refunds and returns.

Digital forms from web / mobile app and Register management, Kiosk, Zenoti Mobile POS

3 to 4 repeat sessions per wave to cover the employee base - schedule planned ahead of the rollout

Instructor Training (10-minute session)

Learning to use the Instructor mobile app to manage their classes, check-in students and other related operations.

Admin and Reports Training – For Admin Staff (2 sessions 2hrs each)

Center-level reports (Financial (Sales, collections, and accounting) and Operational reports) to analyze and manage your business. Resource management

Org / Center settings, Email / Sms templates, Marketing

Manager Training – For Managers and Owners (3hr session)

Employee management - Managing employee records, payrolls, and commissions. Employee Key performance metrics/goals, and Utilization. Zenoti Mobile for employees

Marketing management: Offers through email & SMS campaigns to targeted guest

Guest Management: Cleaning up invalid data & Merging duplicate profiles

Inventory Management: Streamline your ordering process so that you save time creating accurate PO's and receiving deliveries. Creating PO's & auto PO's, Transfer orders, Receiving stock, Audit and reconcile.

1 to 2 repeat sessions per wave to cover all users- schedule planned ahead of the rollout

Go live

Pre-go live activities

The following pre-go-live preparatory tasks are completed by the center managers and center staff before each wave of the rollout.

Customer Team(s): System Administrator, Head of Operations, Center Manager, Center staff

- All possible data cleanup completed in the legacy system prior to final cutover. For example, delete junk guest data, merge guests, streamline vendor names, remove unused products, etc.
- Payment Gateway & Device Setup, as applicable
- Complete all the training and practice on stage site
- Distribute production credentials to center owners

- All the credit card transactions are processed as offline credit card Zenoti
- All other transactions in legacy system are updated in Zenoti (package sale, gift card sales, register closure, retail sales, address changes, etc.)
- Classes/Services list verified and changes sent to Zenoti team
- Products are verified and changes sent to Zenoti team
- Employee schedules are set-up, commissions setup employee service relations verified

Pilot rollout

Customer Team(s): All stakeholders

Duration: Typically 2 to 4 weeks

Approach

Pilot success criteria are defined prior to the pilot start.

The pilot locations are selected to represent the rest of the organization. The pilot process is designed to identify real-world solution tuning to ensure a smoother rollout for the rest of the organization.

All aspects of Zenoti functionality and solutions that have been finalized will be implemented during the pilot. All questions, issues, configuration change requests, data adjustment requests will be documented and tracked

The following reviews will be held during the pilot phase

- Daily (1st week): Issues, change requests review (upto 1 hr)
- End of Week 1: Success criteria review, change items prioritization, preliminary payroll data review (upto 2hrs)
- Week 2: Accounting reports, operational reports review
- End of Week 2: Decision on the rest of the Waves (upto 2hrs)
- Weeks 3 & 4: Training and prep for next wave locations

Wave rollouts

Customer Team(s): All stakeholders

Duration: Variable, typically each wave is spaced out by 1-2 weeks

The following reviews will be held during the phase of the waves rollout

- Weekly: Issues, change requests review (upto 1 hr)
- End of Week 1 of each wave: Preliminary payroll data review (upto 1hrs, a virtual session with center managers/owners)
- Training and prep for next wave locations

-End-
