STRATEGY SESSION

**GOLD'S GYM** × *PerfectGym*

# From brand to operating system.

A working session on how PerfectGym powers Gold's Gym transformation into a true global franchisor.

## TODAY'S SESSION

# Two hours. **Four blocks.**

## 01

### Opening

Who Sport Alliance is. What we heard from your team. The franchisor control layer Gold's is building toward.

## 02

### Near-term priorities

Payments. Data platform. New revenue streams. Transformation support. Roadmap. Tech-support offload.

## 03

### Mid- & long-term

Franchise reference operators. Integrated product strategy. AI strategy.

## 04

### Next steps

Three concrete actions to move from demo into RFI / RFP with confidence.

## WHAT WE HEARD ACROSS THE LAST TWO CALLS

# We've been listening.

*The strategic ambition, not the feature list.*

- 01** Gold's Gym wants to become a true franchisor — top-down control, bottom-up flexibility.
- 02** Gold's gym wants to own the experience layer and needs a platform that respects that.
- 03** Gold's Gyms next phase — international, new revenue, AI — requires one platform, not multiple platforms.

# The operating system **behind global fitness.**

*Hamburg-headquartered. Boston-based US team. 130 engineers. One mission: easy operations and effortless payments for every sports provider, at every scale.*

## VISION

Revolutionize global fitness with **easy operations** and **effortless payments** for every sports provider.

*More sports, worldwide.*

**50%+**

of Europe's top-30 fitness chains run on our platform

**12yr**

of operations, profitable, PE backed

**130+**

engineers shipping into a single codebase

**1**

platform family — Member Engagement, Payments, Data, AI

A DECADE OF INNOVATION · ONE STACK

# From a German MMS to the Global OS for fitness.

**8,000+****clubs migrated to date**

Battle-tested across 8,000+ migrations — the engine Gold's will inherit.

**11M+****members on platform**

Live transactions, identities, payments — every day, across the European estate.

**22K+****live API integrations**

Already utilising our OpenAPI surface — partner & custom integrations live in production.

**100+****certified partners**

Hardware, payments, marketing, aggregators — partners build, partners maintain.

*Scale that compounds. Same engineers, same codebase, same migration playbook deployed across every reference name on the next slides.*

## SPORT ALLIANCE OPERATING SYSTEM

# One foundation. **Three tiers** of fitness operator.

*Same OS, same data model, same Open API. Three configurations of the platform addressing the full operator spectrum — Gold's runs on the enterprise tier.*

**SPORT ALLIANCE OPERATING SYSTEM · Shared infrastructure, identity, Open API, data backbone****MAGICLINE****Small to mid-size operators**

Tailored for SMB studios. Reduced complexity, fast onboarding, full inheritance of OS payments and integrations.

**LEISURE****Leisure centres & enterprise leisure**

Custom-built for large enterprise leisure chains. Configurable workflows with leisure-specific functionality, same Open API.

**PERFECTGYM NEXT****Enterprise fitness chains & franchises**

Gold's tier. Full configurability, multi-club / multi-tenant, franchise hierarchy, network-level finance and reporting.

# One platform. Eleven capabilities. Already live.

*Not a product roadmap — what Gold's franchisees would inherit on day one. Each capability is live for our existing European enterprise estate.*

|                                        |                                            |                                       |                               |
|----------------------------------------|--------------------------------------------|---------------------------------------|-------------------------------|
| Multi-club management                  | Membership · referral · offers · corporate | Reporting & enterprise data warehouse | Financial & debt management   |
| AI-native chatbot & member journey hub | Point of sale                              | Staff management & staff app          | PT calendar & fitness content |
| Branded member app                     | Open API marketplace                       | Global scale infrastructure           | Native AI lifecycle engine    |

*All eleven sit on the same data model. Add one — every other inherits. That's what “integrated product strategy” means in practice.*

## WHY THIS TRANSFORMATION, WITH US

# Four reasons. In your team's words.

## PROVEN

# 9/10

of Germany's largest

Cleverfit, McFit / RSG estate, L'Orange Bleue — the exact franchise model Gold's wants to become, we already operates on our platform.

## FOCUSED

# 1

platform · 1 codebase

130+ engineers shipping into a single stack. Every R&D dollar compounds in one direction — not split across acquired products.

## US-READY

# Boston

AWS Ohio · Dallas-ready

Local team, US-East infrastructure, US payments / tax / GL already live for our existing US footprint.

## MIGRATION

# 8,000+

clubs migrated

28-system importer library. McFit benchmark: 250 clubs in 15 days between two payment runs. Possible playbook for Gold's.

WHERE GOLD'S GYM IS TODAY

50 owned. 200 franchisees. Zero shared backbone.

Gold's stated transformation is becoming a true franchisor. The technology gap is structural — and it's the same gap every brand-led franchise faces before re-platforming.

FRANCHISEE STACK TODAY

|                 |                 |
|-----------------|-----------------|
| ABC Fitness     | Hapana          |
| Jonas           | Zenoti          |
| 5–6 CRM tools   | Local lead-mgmt |
| Local marketing | Local POS       |

No real-time visibility.

HQ has no live picture of what's happening across the estate. Reports arrive monthly, if at all.

Member data is franchise-owned.

Churn signals, lifetime value, brand-level identity — fragmented and locked inside each operator's system.

No platform-level governance.

When brand standards for billing, contracts, or experience diverge — there's no mechanism to correct it.

Operational data leaves with departures.

When a major franchisee walks (recent SoCal example), their data, their members, their history walk with them.

## WHAT GOLD'S IS BUILDING TOWARD

# HQ as **platform owner**. Not HQ as support function.

*True franchisor governance requires the technology to match the model — layered control, single member truth, real-time visibility.*

## 01

### Configurable hierarchy

HQ sets the standards. Franchisees operate within them. Clubs configure what's local. Not flat multi-location, layered governance: what's enforced, what's permitted, what's flexible.

## 02

### One member record

A single identity across every location, visible to HQ regardless of which franchise the member uses. Shared history, shared churn signals, shared lifetime value.

## 03

### Real-time reporting

Not monthly exports. Business performance visible at HQ within minutes, across every location, through the BI tools Gold's already uses.

## 04

### Operational backbone, not experience monopoly

Gold's owns its website, mobile app, CRM. The platform's job is to hold the member record and transaction truth — and let everything else connect to it.

*This is what “true franchisor” means in platform terms. The next slide is why open architecture is the only way to actually get there.*

## WHY OPEN PLATFORM IS THE CORNERSTONE

# Franchisees keep what works. HQ gets the backbone.

*A closed system can only replace one fragmented stack with a mandated one. That creates years of forced migration and franchisee resistance. Open changes the logic of adoption entirely.*

## THE ARGUMENT IN ONE SENTENCE

Perfect Gym gives Gold's HQ the **franchisor control layer** they're building toward — and the **open architecture** means franchisees don't have to abandon their existing tools to get there.

## 01

## Adoption velocity

Biggest risk in any large franchise re-platforming is franchisee resistance. Open lowers the switching cost for each operator — they can migrate onto the central system while keeping the local integrations that matter to them. HQ establishes the backbone first, standardizes progressively.

## 02

## Vendor leverage shifts to HQ

Today each franchisee negotiates independently with the same vendors. On an open platform, Gold's HQ defines preferred integrations, negotiates centrally, enforces connectivity standards across the estate. Individual vendors become interchangeable at the platform level.

## 03

## Future extensibility without lock-in

Gold's ambitions go beyond gyms — medical adjacencies, training packages, new touchpoints. Open means new data sources plug into the existing member record. The MMS grows as the business model grows. No new platform required.

# 02

## Near-term priorities.

Payments. Data platform. New revenue. Transformation support. Roadmap. Tech-support offload.

## PAYMENTS PLATFORM

# Where franchisor control meets franchisee profitability.

*Finion Pay: one financial backbone for the entire estate — unified processing, additional revenue streams through easy payments and future royalty collection*

## ONE STACK

## 01

### Unified payment layer

- US-native ACH (no manual files)
- Omnichannel: Card, Apple Pay, Google Pay
- Account Updater 2.0 (involuntary churn)
- Tokenised card-on-file across web, app, club

## SALE LEVER

## 02

### Hardware & Secondary Revenue

- MDB-ready vending terminals
- Pay at vending terminals by card or in-club-wallet
- SmartPOS-Terminal for fast checkouts
- Frictionless One-Click Payments with CoF

## FRANCHISOR

## 03

### Royalty automation outlook

- 5% captured at source, per transaction
- Settled the moment funds move
- Same ledger franchisee & HQ see
- Audit trail from swipe to royalty

## ROYALTY AUTOMATION OUTLOOK

# No more month-end aggregation.

CAPTURED AT SOURCE

A large, bold, yellow 'X%' graphic is centered on a dark navy blue background. The 'X' is composed of two thick, slightly irregular strokes, and the '%' symbol is also bold and yellow.

per transaction, settled the moment funds move.

## Same data, both sides.

Franchisee sees the same ledger Gold's HQ sees. No reconciliation arguments.

## Build on existing payment infrastructure

Leveraging the existing fee splitting capabilities to run royalty fee splitting natively in the payments layer

## Audit trail.

Every cent traceable from member swipe to royalty ledger.

# From 3,000 to 200 support tickets per month.

## Native chatbot.

Not a third-party widget. Full read/write to membership, billing, scheduling.

## Self-service flows.

Freeze, cancel, change billing, book classes, get receipts — without a ticket.

## Vendor-direct franchisee support.

We offer it. Gold's chooses the support model that matches the org appetite.

## Open marketplace, 130+ partners.

Partners build, partners maintain. Gold's IT doesn't.

## REAL-TIME DATA WAREHOUSE

# One Redshift. **Every club.** Open to your tools.

## Royalty truth source.

Franchisee sees the same numbers HQ sees. Royalty disputes end.

## Cross-franchisee intelligence.

Visit patterns, lifecycle stage, retention — benchmarked across the network.

## Connect the tools you need

PowerBI, Tableau, Quicksight, we support all reporting tools. Want to ETL into your own data-warehouse, build your own queries to extract data from our Redshift.

## Build via API. We ingest.

Custom events flow into the warehouse automatically. No re-platforming.

FROM SILOED TO UNIFIED

Today: three siloes. After: one network-wide view.

TODAY

> Three franchisees, > three databases.

Three exports. Three schemas. CSV stitching. Reconciliation arguments. No member-level view across the network.

AFTER

One operating system. One warehouse.

Every franchisee, every member, one truth. Build your CRM, website, app on top — we don't touch the experience layer.

FIVE FRANCHISOR REVENUE LEVERS

# Levers that compound on one platform.

*What becomes possible when 200+ clubs share one operating system.*

MIGRATION SUPERPOWER

250 clubs. 15 days. Between two payment runs.

McFit benchmark — the migration our team did for your parent company’s largest brand. We bring the same playbook to Gold’s.

28

source systems

Already in our importer library.

8,000  
+

clubs migrated

Across the European estate to date. Largest single migration: McFit, 250 clubs in 15 days.

99.8%

migration accuracy

Legacy-to-target field match

<3%

payment-run deviation

Across all studios during the LifeFit migration. No member impact.

## THREE COMMITMENTS

# How we **de-risk** a 200-club rollout.

## SUPPORT MODEL

## Train-the-trainer.

Franchisor-led control, with guardrails.  
Gold's HQ owns the relationship with franchisees — we equip your team to do it.

## ROLLOUT

## Pilot first, then waterfall.

1–2 friendly franchisees. Prove the operating model. Bake the change-management playbook. Then waterfall — not big-bang.

## DELIVERY

## Boston-based team. Global Support

Dedicated US delivery org. AWS US-East.  
US payments / tax / GL already live for our existing US footprint.  
Supporting team in Australia, Hamburg & Warsaw providing global support coverage.

DIRECTLY RELEVANT TO GOLD'S TRANSFORMATION

Five items shipping in the next three quarters.

|                                                                                                                                                                    |                                                                                                                                                                      |                                                                                                                                                                                         |                                                                                                                                                                                                     |                                                                                                                                                              |

## GOLD'S GYM EUROPE

# You're already a customer. We're proposing to extend that relationship.

## goldsgym.de joining flow.

Pulls live from our API today. The Berlin club's full member journey runs on PerfectGym.

## Perfect AI Chat live on the site.

Freeze a membership, book a class, ask about a charge — all transacting, not just answering.

## RSG estate operating model.

The multi-tenant, multi-brand pattern we already run for your parent — McFit, John Reed, Heimat all included.

## Zero migration risk on the European side.

The global integration story starts from a working base, not a green field.

**LIVE TODAY****goldsgym.de**

Berlin club joining flow, member app, AI chat, real-time data — all on PerfectGym infrastructure.

CLEVERFIT, GERMANY

# Germany's largest fitness franchise, one tenant.

A large, bold, black number '600' with a tilde '~' to its left, indicating approximately 600 franchise clubs.

## franchise clubs

In a single tenant model. One HQ, hundreds of operators, network-wide reporting. Operating in multiple countries.

A large, bold, white number '60' with a tilde '~' to its left, indicating approximately 60 corporate-owned clubs.

## corporate-owned clubs

In the same tenant, same hierarchy. The franchisor-and-operator model live, today.

A large, bold, black number '1' representing a single permission tree.

## permission tree

Multi-franchisee. HQ control, franchisee flex. The exact pattern Gold's needs.

*The architecture that lets one HQ supervise 660 clubs without controlling them — inherited pricing, network-wide reporting, each franchisee owning their P&L.*

L'ORANGE BLEUE, FRANCE

# ~550 franchise locations. Same architecture.

FRANCE

# ~550

**Franchise clubs, single platform, French regulatory regime.**

## Per-region pricing variance.

Under one membership SKU, the same pattern Gold's US needs across states.

## Configurable accounting / GL.

With item-level tax. US net + state VAT model is live for our US footprint.

## Bulk operations across club scopes.

Price increases, club-closure migrations — in minutes, not weeks.

## Localised member-facing experience.

On top of the shared OS.

# Same parent company. Same platform.

*The McFit migration is the proof point for what Gold's US is contemplating — at scale, on schedule.*

# 250

**clubs migrated**

In a single 15-day window, two payment runs apart.

# Realtime

**auto-scaling**

For promo campaigns — the spike when McFit runs national TV creative.

# 1 tenant

**whole RSG estate**

McFit, John Reed, Heimat, Gold's Europe — all under one operating system.

PRODUCT EVOLUTION

# Twelve years of building toward this moment.

*One operating system underneath. Brand layer on top. All R&D dollars compound in one direction.*

OPEN BY DESIGN

# Gold’s owns the experience layer. We provide the OS.

GOLD’S OWNS · EXPERIENCE LAYER

Website · Mobile app · CRM · Brand · Member journey · Kiosks

ALL R&D, IN ONE DIRECTION

# One codebase. 130 engineers.

*When you evaluate references, ask one question of every vendor: where does the 2027 R&D dollar go?*

ABC FITNESS

3+

MMSs in market

Datatrak, Ignite, Glofox — three platforms competing for the same R&D budget. Where does the 2027 dollar go?

XPLOR / EXERP / MARIANA TEK / CLUB READY / MEMBR

~25

MMSs via M&A

Breadth on the slide. Fragmentation in the codebase. The integration story is a slide — the operating reality is not.

PerfectGym / Sport Alliance

1

codebase. One direction.

Predictable roadmap. Every feature inherits payments, DWH, AI, multi-tenant. Twelve-year track record — not a 2024 reposition.

# Native, not bolted on.

*Sport Alliance’s AI USP: deep platform integration, real data, real context, real actions — defensible competitive edge no third-party bot can replicate.*

LANE 01

## Native-first AI agents

Embed AI agents natively across every workflow and channel. Real context, real data, real actions — not achievable with third-party bots.

LANE 02

## Competitive-advantage ML

Turn unique industry data into world-class ML: churn prediction, segmentation, payments acceptance, next-best actions — tied to in-product execution.

LANE 03

## AI thought leadership

Lead the category with proof. Publish outcomes, partner on standards, showcase customer wins. Build trust, demand, premium pricing.

# Native AI doesn't answer questions. **It transacts.**

*Engine: LangChain4j orchestration on Anthropic Claude models hosted on AWS Bedrock.*

## Gold's Gym Berlin · AI Chat

Need to freeze my membership in May — travelling for work.

Sure. I can freeze your account May 1–31. Next charge will skip and resume June 1 at €49. Confirm?

Yes, do it.

✓ **Done. Confirmation in your email. Enjoy the trip!**

*Live action · not a deflection script*

## Full read/write to business logic.

Membership, billing, scheduling, retail, the chatbot does what staff can do.

## Freeze · book · pay · cancel.

Live actions, not deflection. Ticket counts drop because the work is actually done.

## User-authenticated, safely.

Same identity layer as the member app. Audit trail per action.

## One config, every franchisee.

Configured once at HQ. No franchisee buys their own AI. No data sprawl.

# Personalised conversations, at network scale.

*Reactive AI continues the dialogue. Proactive AI triggers it at the seven lifecycle moments where operators today are structurally unable to act.*

## Multi-channel orchestration.

WhatsApp, SMS, email, push. Same conversation, channel-hopping seamlessly.

## Live ML intelligence.

Triggers from churn risk, attendance drop, LTV score, lifecycle stage.

## A/B testing built in.

Control groups. Impact analysis. Roll out the win, retire the loss — automatically.

## Seven lifecycle moments.

Lead, join, thrive, drift, dormant, win-back. Engage finds the moment. Chat closes it.

THREE LAYERS OF AI

# Member. Operator. Decision.

LIVE NOW

Member-facing

## Perfect AI Chat

Joining, self-service, support deflection.  
Conversational. Transacts directly.  
Authenticates members.

2026 Q2

Decision-facing

## Predictive ML

Churn prediction. Lifetime value scoring.  
Attendance-drop triggers feeding the Engage  
automation engine.

2026 H2

Operator-facing

## Agentic admin tools

Rick’s request. Exception surfacing. “Members  
likely to churn this week — with one-click  
action.”

## WHY NATIVE MATTERS AT FRANCHISE SCALE

# Configure once at HQ. Apply everywhere.

*The alternative — each franchisee buys their own AI tool — creates exactly the data sprawl Gold's is trying to eliminate.*

**BOLTED-ON AI**

## Each franchisee picks their tool.

- ✗ Three siloed data layers
- ✗ HQ governance becomes optional
- ✗ AI sees what it's vendor sees, not the business
- ✗ No write access to membership, billing, scheduling

**NATIVE AI IN THE OS**

## One configuration at HQ.

- ✓ Every franchisee inherits automatically
- ✓ AI has full read/write to business logic
- ✓ Brand voice and policy enforced top-down
- ✓ Future-proof: scales with Magicline as it evolves

AI VALUE PROPOSITION

Revenue. Cost. Member experience. Operations.

Driving revenue, reducing cost, deepening member relationships — through AI-powered digital workforces native to the OS.

REVENUE

Generation

Upsell predictor, churn-trigger retention, always-on sales agents, lead qualification.

OPEX

Reduction

Service desk automation (~30% of inquiries), AcceptanceAI for payments — one-click claim processing, lower reversals.

MEMBER EXP.

Experience

Member Journey Hub with AI segmentation + A/B testing. Gamified engagement. Personalised onboarding.

OPERATIONAL

Efficiency

Operators focus on excellence; AI manages complexity behind the scenes. Configured once, applied everywhere.

## WHAT WE'RE PROPOSING

# Three **concrete** next steps.

## 01

### Join the RFI / RFP

With a named US-based team and committed reference calls - Cleverfit, L'Orange Bleue, Gold's Europe, McFit.

## 02

### On-site working session in Dallas

One to one-and-a-half days. Daniel, Erwin, Konstantin + US Product team. Scoped to Gold's specific franchisor model.

## 03

### Hamburg HQ visit for Danny & Ryan

Meet PerfectGym & Sport Alliance. See McFit operations live. Understand the strategic relationship.

---

**CLOSING**

**We're already running Gold's Gym  
in Europe.  
Let's make Gold's Gym **the global  
standard.****

*On one platform — with your team in the driver's seat, and ours doing the work behind it.*

---

**THANK YOU**

# We look forward to continuing the conversation.
